Profile

I am a reliable and resourceful full stack senior developer. I have been coding commercially for over 25 years and coding for fun for over 35 years. These days, I am primarily Javascript / Typescript focused using React on the front end.

Experience

Technical Lead - Front end - Esure.com - Aug 2022 - Present

I am currently working as technical lead as part of the program working on a digital transformation of an insurance business. I run multiple squads from a people management and technical perspective. Mostly focused on the front end but with elements of back end coding, such as node, Grafana alerting, Jenkins pipelines.

Skills: Cross-functional Team Leadership · Communication · Technical Leadership · Engineering Management · Front-end Engineering · Team Leadership

Senior Engineer - React - Esure.com - April 2022 - Aug 2022

After a year I was promoted to Senior Engineer, which included additional responsibilities such as line management, interviewing, mentoring and technical leadership aspects.

Senior Full Stack Developer - React - Esure.com - Jan 2021 - March 2022

I was initially working as a full stack developer as part of a team working on a digital transformation of an insurance business. This is a fully agile team run with a scrum master, using Jira for the tickets with a fully automated CI/CD system. As a senior developer in this role my responsibilities include assisting development of the component library and applications that consume it, mentoring junior developers, interviewing potential candidates. The front end is built with React with a component library built upon Material UI with a custom NPM component library that facilitates code reuse and stability.

Frontend Lead Developer - React - MoneyExpert.com - Jan 2020 - Nov 2020

I was working as Frontend tech lead, leading a small team of developers. This is across a range of B2B applications and websites. We are using React and Redux for the frontend, with a .Net bespoke back end API system.

Experience	**Freelance Full Stack React Developer** - Aug - Dec 2019 - **Jack Morton Worldwide**
	Freelance Full Stack AEM React Developer - Mar - May 2019 - **NET builder**
	Freelance Full Stack React Developer - Feb - Mar 2019 - **Native**
